

POWER LINE LED

1070 SERIES

CABIN
DENMARK

This new series of LED lights is designed for general lighting, reading light or cabinet light. Quality light wherever you need it.

The 320mm light give the same warm white light as a 35W halogen bulb. An integrated LED driver regulates voltage fluctuation and garanties steady light output.

Power consumption only 5W. The lifetime of the LEDs is more than 50.000h.

The lights are made of aluminum with acrylic lens/cover. The lights are surface mounted and need minimum space. Easy fixing with screws.
