ADMIRAL II

The chrome-plated solid brass case with bicolor blue scale testifies to its owner's love of the maritime way of life. This traditional mechanical ship's bell clock with Swiss escapement and the combination measuring instrument with a double-aneroid barometer, thermometer and hygrometer are beautiful eye-catchers—not solely on shipboard. For aficionados of the classical maritime style, this series is also available with a high-gloss brass case coated with colorless lacquer. In addition to the mechanical ship's bell clock and the combination measuring instrument, are also available in this series a quartz ship's bell clock, a quartz clock with additional tidal indicator, and a double-aneroid barometer.
